reviews by 1 customers I have to admit that I usually don't like experimenting with software. And the earlier versions of the software by Eurostar were pretty buggy. But this one is different. It has a very nice user interface which is easy to operate and does not require a long training period. It has a lot of features which make this software an interesting tool for the digital radio hobby. The quality of the sound is excellent, the sound is always balanced to the best. There is no difference in the sound quality when the radio is on or off. The interesting feature of the software is the sound in stereo or mono which can be selected on the receiver before playing. There are also a lot of different filters such as amplifier, DSP, to select the frequency, the modulation, the audio quality, the amplification and the calibration. At the end of the radio you can select the channel of the radio. And there are so many buttons to adjust the radio. I had no problems with the station channels, the auto tune in stations or programming the radio. So this is a very nice software and I recommend it to the radio enthusiasts. Help & Support Follow Us Eurostar's 9600 receiver software 27 reviews by 1 customers See all reviews Review by joey Review Source: GetApp Rating: 5 4 July 2019 Great Great piece of software, very intuitive and easy to use and just a pleasure to use. It works just as advertised and it is a pleasure to use. The sound quality is great, and the filters are great, too. It plays everything I throw at it, and everything works exactly as I expect it to. Eurostar made a great job with the software. Review by tim Review Source: Capterra 30 January 2019 Wow A fantastic piece of software, easy to use and to master. If you are a regular reader of NPO, the exact requirements of the software will be listed on the product information pages for the latest version. This is very important to know whether the software is suitable for your requirements, especially if you are buying this software. If you want to know exactly what you get, you have to check this page. The software is easy to use. The possibilities are quite good, it is not too complex but does have good options to refine the output for your needs. The 82157476af
